In the spring of 2022, the sound study was completed. The Farm, as it promised, fully adopted the recommendations of the sound engineer, purchased and caused to be installed the recommended equipment. (See Exhibit D of Defendant's Opposition to Preliminary Injunction). After the installation of the equipment and during several weddings, the Chief of Police and the sound engineer met to review the equipment, meter the sound and evaluate the remedial consequences of the Farm's endeavors. See Affidavit of Kevin J. Guinee Defendant's Opposition to Preliminary Injunction.
